

# Aerating Fountains

## SUNBURST

Otterbine's signature pattern, the Sunburst provides excellent aeration to any pond or lake while displaying a conservative yet striking pattern.

## GEMINI

This plume like spray is a regal enhancement to any waterway, the Gemini is a superb selection when desiring a beautiful pattern with strong aeration capabilities.

## ROCKET

Producing a geyser type pattern, the Rocket's attractive display looks wonderful by itself or combined with other Otterbine Aerating Fountains.

## TRISTAR

Celestial, elegant and true to its name, the Tristar creates a tri-level star pattern that combines aesthetics with function.

## PHOENIX

Like the Phoenix rising from the ashes, this two-tiered pattern creates a winged wonderment in any pond or lake.

## COMET

Maintaining its symmetry and splendor, this magnificent pattern creates a thick, lustrous column of water that will fascinate even the most discriminating onlooker.

## CONSTELLATION

Designed to hold its pattern in windy conditions, this intricate two-tiered, fountain-like pattern captures its audiences attention with awe-inspiring beauty.

## SATURN

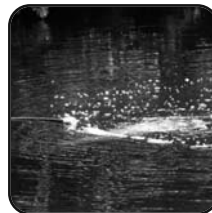

The Saturn produces a more compact and fluid pattern than the Sunburst, providing you with another strong aeration package in the Aerating Fountain line.

## GENESIS

The Genesis' two tiers and 16 silhouetted streams cascade into the waterscape resembling that of an architectural fountain, acting as a dramatic and enticing focal point that captivates onlookers from all around.

# Industrial Aerators

## TRITON ASPIRATOR

The Triton Aspirator components allow for surface oxygen to be transferred to the pond bottom. Available floating or submerged.

## TRITON MIXER

Triton Mixer induces oxygen and creates horizontal circulation making it an ideal unit for applications with stagnant waters, as well as a remarkable de-icing unit. Available floating or submerged.

## AIR FLO 2

A shore mounted compressor pumps air to self cleaning dome diffusers, (or air stone diffusers,) at the pond's bottom making Otterbine's diffused air system perfect for recreational and deep water applications.

## HIGH VOLUME

Surface aeration when you need it. Ideal for effluent waters the High Volume is used on golf courses and in other areas that may experience nutrient run-off.

# Fountain Lighting

## FOUNTAIN GLO™

Otterbine offers Low Voltage and High Voltage light sets for their floating aerator and fountain systems. Enhance your landscape at night, and add security to your property with Otterbine's Fountain Glo light systems.

# Allied Products

## OTTERSIELD

Otterbine's lake dye comes in water soluble packets for ease of installation. Enhancing your water's color, it also helps to block UV rays - hindering photosynthesis, thus reducing algae growth.

## OTHER OTTERBINE PRODUCTS WE CARRY:

Giant Fountains, Instant Fountain, Fractional Aerators, plus 7.5HP & 10HP Aerating Fountains Available with 6 Patterns!

- ☞ Installations
- ☞ Maintenance Programs

# TURF EQUIPMENT & IRRIGATION INC

The staff at Turf Equipment & Irrigation, Inc. proudly represents Otterbine as a distributor for the complete line of Otterbine aerators and fountains.

Offering unparalleled quality, performance and value - Otterbine aerators are manufactured to withstand years of service even in the most challenging environments, including brackish and effluent conditions.

Ideal for virtually any pond or lake, Otterbine's line of aerators offer the industry's highest independently tested flow and pumping rates, and is one of the only manufacturers to have their package tested and listed with ETL, ETL-C, and CE for electrical safety.

With flow rates exceeding 1000 GPM, Otterbine's aerators induce oxygen into the waterway, improving water quality naturally by breaking up thermal stratification and eliminating odors.
